Green Homes Construction Specifications

CERTIFIED GREEN HOMES TECHNOLOGIES

- Up to 14' high concrete block exterior walls CMU or ICF walls per plan.
- ICF Exterior Walls. Insulated Concrete Form wall construction includes steel rebar reinforced 4" poured concrete walls with 2 1/2" expanded polystyrene insulation on both sides with up to R-29 insulation value.
- ICF exterior walls are capable of withstanding up to 200 mph winds and flying debris, fire resistant up to 4 hours and sound suppressant.
- Insulated, hurricane resistant reinforced raised panel garage door with ICF walls.
- Monolithic slab foundation, minimum 20-inch footers with at least two #5 rebar reinforcements.
- 3000 PSI fiber-mesh concrete to reduce cracking in all slabs.
- Wind Mitigated roof: no ridge vent, because of enclosed envelope design with the roof insulation.
- Engineered roof truss system withstands up to 140 mph wind with hurricane straps set in concrete walls.
- 1/2" Zip Board roof sheathing.
- Mildew and fungus resistant, fiberglass dimensional roof shingles with 30-year manufacturer's warranty.
- Spray foam open cell roof insulation. 5 1/2" above A/C areas and 3 1/2" above garage. Applied directly to the bottom of the roof decking, reducing energy intake.
- Maintenance free aluminum fascia and vinyl soffit.
- Exterior walls finished with stucco.
- Exterior walls coated with 2 coats of high-quality paint for long life and low maintenance.
- Energy-efficient, Low-E, double pane, insulated, single hung, vinyl windows throughout.
- Energy Star® 16 SEER central A/C system with heat pump (sized per plan).
- Whole Home In-Duct Air Purifier. Kills up to 99% of bacteria, mold, and viruses.
- Regulated fresh air flow from the outside. Returns in all bedrooms.
- Low VOC interior & exterior paint.
- Certified FPL BuildSmart home.

- EPA Certified Energy Star home.
- Certified Green by Florida Green Building Coalition.
